2.a Attendance at workshops

The table(s) in this section reports participation only for session series that are completed.

nFORM generates a table that reports on participation for each workshop offered by the grantee. The primary population served, workshop name, workshop activities, workshop elements, and workshop type automatically fill from what grantees enter in nFORM.

Example of nFORM-Generated Table on Participation:

Primary Population Served: Workshop Name: Workshop Activities: Workshop Type: Workshop Curricula: Workshop Elements:	Adult couples	
	#	%^a
Workshop Attendance		
Attended at least one workshop session series occurrence		
Workshop Retention		
Attended 1 to 50% of workshop session series hours		
Attended 51% or more of workshop session series hours		

^a Denominator is all clients/couples enrolled during reporting period who are registered for/or attended the named workshop.

Table 2 Columns:

Column (BP) lists the benchmarks for client participation in primary workshops for which ACF requires grantees to set annual targets and measure progress towards those targets. The grantee's current grant year targets for each benchmark are presented in column (TGT). Progress towards the targets is measured based on client participation in the grant year in both completed and ongoing workshop session series, where session attendance has been fully recorded.

Columns GY1 to GY5 include the count of clients enrolled in each grant year who achieved the respective benchmark for participation in the current grant year. Columns are only shown for the current and prior grant years. For participation among those enrolled in the current grant year, the rows are measured cumulatively such that those who attended at least 100% are included in the "attended at least one" row as well.

Column (TC) is the total count of clients who achieved each benchmark in the grant year, whether the clients were enrolled in the current or prior grant years (sum of all GY columns).

Column (TGT) is the grantee-established target for the number of clients who will achieve each participation benchmark during the grant year, regardless of when they enrolled.

Column (PCT) is the percent of the target met for each participation benchmark.

Section 2b. tables 1 and 2 (including footnotes) repeat for each applicable population.
